

Identifying the impact of cannabis use on
mental health outcomes among sexual
and gender minority (SGM) youth:
A mixed-methods study

PI: Dr. Rod Knight, UBC

STUDY PARTICIPANTS WANTED!

Do you identify as a sexual or gender
minority and consume cannabis?
Are you between 15-24 years old?
Are you living with mental health
challenges in BC?

You may be eligible to participate in a
photovoice study about your experiences
navigating cannabis use and mental health
challenges. Study participation involves:

1st meeting (30 mins)

Take photographs over two weeks

2nd meeting with Interview (60-90 mins)

We can meet using Zoom.
